TDNet Journal Manager V3.0

Release Notes of Enhancements

TDNet is pleased to announce version 3.0 of Journal Manager, presenting a new look to the User Interface and enhancements based on feedback from our valued customers. The new modern look and feel maintains all of the familiar features that you have come to depend on from TDNet, with the addition of important new functionality and reporting options.

Multi-language Interface Support

In addition to the existing Unicode support, TDNet now offers full Multi-language interface support.

Quick Search

A more visually prominent Quick Search box simplifies the initial search experience for users.

A screenshot of the Quick Search interface. It features a search box with the text 'Nature' entered. Below the search box are two dropdown menus: 'Journal Title' and 'Keywords'. To the right of the 'Keywords' dropdown is a question mark icon. A 'Search' button is located to the right of the question mark icon.

Quick Search:	Nature		
Journal Title	Keywords	?	Search

Version 3.0 permits administrators the option to remove or rename the TDNet default search terms.

Customize Search Defaults

Please enter alternative text in textboxes.

Search Type Text (leave blank to remove)		
Partial Words:	<input type="text" value="Keywords"/>	Restore Default
Begins With:	<input type="text" value="Title Starting With..."/>	Restore Default
Exact Words:	<input type="text" value="Exact Words"/>	Restore Default
Exact String:	<input type="text" value="Exact String"/>	Restore Default
Exact Phrase:	<input type="text" value="Exact Phrase"/>	Restore Default

Quick Search Options		
Set "Quick Search" default:	<input type="text" value="Keywords"/> ▼	Restore Default
Add Article Search in "Quick Search":	<input checked="" type="checkbox"/>	Restore Default

Banner Buttons and Page Footers

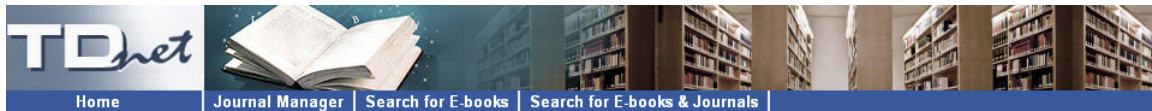

This new version now offers customizable, matching banner buttons and page footers.

“Google-like Results Screen”

The new Journal Manager Results Screen now delivers a more familiar, user-friendly format that combines with a wide variety of tools to help you organize, refine, or expand your search results.

The screenshot displays the Journal Manager interface. At the top, there is a navigation bar with the TDnet logo and links for Home, Search TDNet, My Profiles, eBook Manager, and About TDNet. Below the navigation bar, a search bar shows the query 'Article Title: Nature;'. To the right of the search bar are buttons for 'New Search', 'Narrow Search', and 'Next 10 >>', along with the text 'Results 1 - 10 of 1417'. Below the search bar, there is a section for '0 selected citations' with a 'Clear' link and buttons for 'Bibliographic export', 'E-Mail Marked results', 'E-Mail First 100 results', and 'Order document'. The main content area lists five search results, each with a checkbox, a plus sign, and a title. The titles are: 'Multifactorial nature of hepatocellular carcinoma drug resistance: Could plant polyphenols be helpful?', 'Chemical and electrochemical behavior of uranium (VI) in oxide salt melts: The effect of the nature of the salt-solvent's cation and anion', 'Diurnality and nocturnality in nonhuman primates: comparative chronobiological studies in laboratory and nature', 'The fourth shift: exploring the gendered nature of sleep disruption among couples with children', and 'BOOK REVIEWS: From the Nature of the Mind to Personal Dignity: the Significance of Rosmini's Philosophy. By Juan F. Franck'. Each result also includes the author(s) and the journal name.

Expanded Search Results

One-click to expanded bibliographic information and full text access when users click on the + sign next to an article title. One-click to select and export result.

More Bibliographic Export Options

As before, Journal Manager Version 3.0 offers users the ability to export selected article citation lists to EndNote, Reference Manager or RefWorks. Multi-citation export is also enabled.

E-mail and Print Export Options

Journal Manager Version 3.0 offers users the ability to print or export selected article citation lists via e-mail. In addition to e-mailing selected citations, users can also e-mail the first 100 results from the new search results screen.

New icons

For access:

-  - Full Text access
-  - View TOC
-  - Password
-  - Partial access

Icons Next to titles:

**New Journal Notes icon  now appears at the journal title.

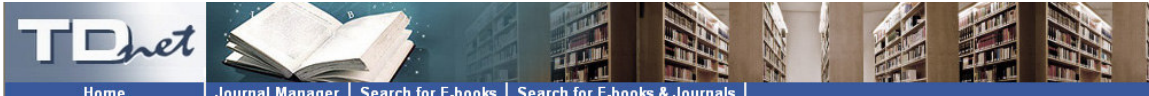

My Profiles

The new My Profiles screen makes setup more efficient.
The new Profile toolbar buttons makes Navigating within a Profile more efficient.

Journal Title	Online Coverage	Full Text Access	Table of Contents
Check Titles to add to your profile.			
<input checked="" type="checkbox"/>  A-Mark Financial Corporation Swot Analysis EBSCO (Business Source Alumni Edition - All)	12/2003 - 12/2003		Table of Contents Current
<input checked="" type="checkbox"/> A. M. A. Archives of Internal Medicine Publisher	1998 - 1950 -1960

TOUResolver

Version 3.0 adds additional customization options for Article Finder page.

Counter Reports for Group Sites

Administrators of group sites will now have the option of extracting Counter Reports for all sites in one report.

Overlap Reports

With the new version of Journal Manager, TDNet introduces several new reporting options, including the **Overlap Analysis Report**, which enables you to compare and analyze your collections for more effective collection management.

Customers can now compare their complete holdings data against a single option from a vendor that you do not yet have in your knowledgebase.

You now have the option to compare up to 10 new collections in the TDNet knowledgebase.

These new functions will permit administrators to eliminate duplication in their holdings.

Please note that work to expand this new function is ongoing. Additional enhancements to this function will occur in the near future and are dependent upon your remarks and comments.

Viewing New Collection Lists

This new version now offers the option to export a collection list that you wish to view, prior to adding to your holdings.

Second Level Administrator Function

TDNet is now offering a second-level administrator function that includes knowledgebase searching and statistics browsing. This function permits other staff members to browse and generate reports without the option to make actual changes to your knowledgebase. If you are interested, just ask Customer Support to activate this function.

New Search Tools for the Librarian and Information Professional

TDNet introduces **TooLIP (Tool for Information Professionals)** to librarians and information specialists for searching across Open Access resources with real-time analysis and automatic metadata tagging. This tool is based on TDNet's world class Federated Search Engine, Searcher Analyzer. Usage is free.

TooLIP goes beyond ordinary searching. It automatically analyzes full text and groups all items retrieved into on-the-fly created clusters. Clustering allows quick identification of items that are most relevant to the reader's needs as formulated in the query.

TooLIP connects to an array of open access resources, forums, discussion groups, professional blogs, newsletters, bulletin boards, e-books and more.

TooLIP may be accessed via the Administrator Module. Just click on the **TooLIP** link and register to start your search.
